

The human resources department of the Formentera Council announces the impending publication of a series of positions for services in the summer high season.

Four positions will be listed for blue zone parking attendants, two for environmental “informers,” thirteen for youth workers at the summer school, three for the inspection brigade (two of which, with option to work at sea, require professional skipper’s accreditation).

The job listings will be posted next week to the public-administration employment section, *ofertes públiques*, of the regional jobseekers' service (SOIB) website.
